SUMMARY

Energetic computer science major/management minor, aspiring software engineer with a strong passion for teamwork, continued growth, and opportunity to demonstrate technical skills and professional commitment for success.

HIGHLIGHTED SKILLS

- **Languages:** Python, Java, C, C++
- **Databases:** SQL
- **Testing:** Unit Testing
- **Architecture:** Operating System (OP), Networking, Data Structure
- **Skills:** Electrical circuit, Soldering, Networking, Perseverance, Problem Solving, Public Speaking, Excel, Financing, Jupyter notebook
- **Other:** GitHub, Game Development, Computer Hardware

EDUCATION: I am currently a Computer Science major/Management minor at Bridgewater State University. I am also pursuing a data science certificate. I currently hold a 3.6 GPA, and have been named to the deans list 5 times.

PROJECTS:

1. Operating System:
 - Developed a command-line file system simulating disk storage with block allocation, free map management, file table tracking, and core system calls including create, read, write, delete, list, and format.
2. Networking:
 - Developed a Sliding Window protocol to help simulate the processes within the TCP/IP protocols within Java.
3. Computer Hardware:
 - Developed Multiple gates on a breadboard and have experience with not only following schematics, but also soldering.
4. Data Science/Data Analysis
 - I am currently developing a social crime trend analysis based on New York state Using their csv data along with Jupyter notebook

5. Object Orientated Programming

- Developed a Program based on the movement of a Goomba with the use of ascii animations.

WORK EXPERIENCE:

1. WBLA/Tech Etch Intern - In this position my group and I added Matthew Tower in creating a solution that would be able to sort his articles for later use.
2. Johnson and Johnson software Intern - In this position I worked with Garret Goode, to help create a working connection between our programming and a monitor that would be in use for knee surgery
3. Somerset Ridge/Sarah Brayton Dietary Aide - In this position I work in the kitchen in a team environment to help create and send trays to our residents

ADDITIONAL:

1. Presented at Stars Symposium 2024, with my project using the BSU telescope and software to color a picture of a constellation.
2. 2023 Mass Stem Hub award winner
3. Future 2026 Presentation at Stars Symposium around my finding within the crime trends of New York State.
4. Currently student member of both the AICPA and student member of the Mass CPA's
